HON. RUSSELL SAGE,	-	-	-	BROOKLYN.

EXECUTIVE BOARD.

JOHN B. TREVOR, *Chairman, ex-officio*,
WILLIAM N. SAGE, *Secretary and Treasurer*,
MARTIN B. ANDERSON, LL. D., *ex-officio*,
ELIJAH F. SMITH,
ELON HUNTINGTON,
HON. HIRAM SIBLEY,
HENRY W. DEAN. M. D.,
EDWIN O. SAGE,
MARTIN W. COOKE,
FRANCIS A. MACOMBER,
EDWARD M. MOORE, M. D., LL. D.

COMMITTEE ON INTERNAL MANAGEMENT.

MARTIN B. ANDERSON, LL. D.,
HENRY W. DEAN, M. D.,
WILLIAM N. SAGE.

COMMITTEE ON LIBRARY AND CABINETS.

MARTIN B. ANDERSON, LL. D.,
ELON HUNTINGTON,
MARTIN W. COOKE.

The Faculty.

MARTIN B. ANDERSON, LL. D., PRESIDENT,
Burbank Professor of Intellectual and Moral Philosophy.

ASAHEL C. KENDRICK, D. D., LL. D.,
Munro Professor of the Greek Language and Literature.

ISAAC F. QUINBY, LL. D.,
Harris Professor of Mathematics and Natural Philosophy.

HENRY A. WARD, A. M., F. R. G. S.,
Professor of the Natural Sciences.

SAMUEL A. LATTIMORE, PH. D., LL. D.,
Professor of Chemistry.

ALBERT H. MIXER, A. M.,
Professor of Modern Languages.

JOSEPH H. GILMORE, A. M.,
Professor of Logic, Rhetoric and English Literature.

UNIVERSITY OF ROCHESTER.

OTIS H. ROBINSON, A. M.,

Professor of Mathematics.

WILLIAM C. MOREY, A. M.,

Professor of the Latin Language and Literature.

OTIS H. ROBINSON, A. M.,

Librarian.

SAMUEL A. LATTIMORE, PH. D., LL. D.,

Curator of the Cabinets.

JOSEPH H. GILMORE, A. M.,

Financial Secretary.

ELIJAH WITTHALL,

Janitor.

Total,	-	-	-	-	-	-	-	-	-	173

* * Students who are temporarily absent are marked A ; students who have entrance conditions to make up, C ; students who have term examinations to make up, E.

Organization.

THREE courses of study are open to members of the University :

I. THE CLASSICAL COURSE, extending through four years ; at the expiration of which time, those who have satisfactorily met the requirements of the Faculty are admitted to the degree of Bachelor of Arts.

II. THE SCIENTIFIC COURSE, extending through four years, and embracing no Greek, and only so much Latin as is essential to the successful prosecution of the Modern Languages and the mastery of scientific terminology. In the place of Greek and Latin, a more extended course of study is prescribed in Physical Science, Mathematics, History, and the Modern Languages. Those who satisfactorily complete this course, are admitted to the degree of Bachelor of Science.

III. THE ECLECTIC COURSE, designed for students who may desire to attend the recitations of particular departments, without becoming candidates for degrees. Such students are admitted, provided they have the requisite preparation for the studies of those departments, and become subject to the laws of the University. This arrangement is designed to meet the wants of those whose age, or circumstances, may prevent them from pursuing either of the regular courses, but who are desirous of obtaining the liberal culture which the studies of a portion of the course will give them. Special care is taken to give such persons the instruction which they require.

REQUIREMENTS FOR ADMISSION.

Candidates for admission to the University are expected to furnish satisfactory testimonials respecting character; and, if from other colleges, certificates of regular dismissal.

No person will be admitted to the Freshman Class who has not completed his fourteenth year, or to an advanced standing without a corresponding advance in age.

The Monday and Tuesday before Commencement, and the Wednesday before the opening of the following term, are the regular times for examining candidates. Examinations may take place at other times at the discretion of the Faculty.

FOR THE CLASSICAL COURSE.

Swinton's Progressive English Grammar; Guyot's Common School Geography; Swinton's Condensed History of the United States; Robinson's Arithmetic; Robinson's University Algebra—to Quadratic Equations; Robinson's Geometry—three books; Harkness's, or Allen and Greenough's, Latin Grammar; Four books of Cæsar's Commentaries; Four Orations of Cicero—of which one shall be that for the Poet Archias, and one, that for the Manilian Law; Six books of Virgil's *Æneid*; and 39 sections in Arnold's Latin Prose Composition; Hadley's, or Crosby's, Greek Grammar; Three books of Xenophon's *Anabasis*, and one book of Homer's *Iliad*.

FOR THE SCIENTIFIC COURSE.

The same as for the Classical Course, with the exception of the requirements in Greek.

FOR THE ECLECTIC COURSE.

Sufficient preparation to profit by the instruction given to any existing class.

A fair equivalent for the above requirements will, of course, be accepted, but candidates for admission are advised to conform, literally, to the requirements of the catalogue. Upon their examination for entrance, and in their subsequent instruction, it will be taken for granted that they have done so.

Persons who wish to pursue studies in this city or vicinity, preparatory to admission to the University, will find ample facilities for doing so, under the advice and direction of the Faculty.

Any student who may be admitted to the University under conditions; as also any student who, after admission, may have shown himself deficient in any department of study, will be required to make up his deficiencies under a private tutor, who shall be selected by the Faculty. All existing deficiencies of this nature will be noted in the catalogue.

Courses of Instruction.

CLASSICAL COURSE.

FRESHMAN CLASS.

FIRST TERM.	{	LIVY— <i>Lincoln</i> .
		Latin Prose Composition— <i>Arnold</i> .
		THE MEMORABILIA OF XENOPHON.
		Greek Ollendorf— <i>Kendrick</i> .
		ALGEBRA— <i>Robinson</i> .
	{	Phonetic Analysis and Phonography— <i>Pitman</i> .

SECOND TERM.	{	LIVY.
		Latin Prose Composition—completed.
		SELECTIONS FROM THE GREEK HISTORIANS.
		Greek Ollendorf—completed.
		ALGEBRA—completed. GEOMETRY— <i>Robinson</i> .
	{	Vocal Culture— <i>Monroe's Vocal Gymnastics</i> .

THIRD TERM.	{	THE ILIAD OF HOMER.
		GEOMETRY AND TRIGONOMETRY.
		LECTURES ON ENGLISH COMPOSITION.
		Lectures on Elocution—Class Room Declamations.

SOPHOMORE CLASS.

FIRST TERM.	{	SURVEYING, NAVIGATION AND ANALYTICAL GEOMETRY.
		HORACE— <i>Lincoln</i> .
		Lectures on Roman History.
		FRENCH— <i>Fasquelle</i> .
		Lectures on the English Language and Literature.
	{	Mediæval History.

SECOND TERM.	{	DIFFERENTIAL AND INTEGRAL CALCULUS— <i>Loomis</i> .
		SELECT ORATIONS OF DEMOSTHENES.
		GERMAN— <i>Woodbury</i> .
		Readings and Dissertations in English Literature— <i>Chaucer—Clarendon Press Edition</i> .
		Mediæval History.

UNIVERSITY OF ROCHESTER.

THIRD TERM.	{	TACITUS.
		Lectures on Roman Literature.
		FRENCH.
		GERMAN.
		Readings and Dissertations in English Literature— <i>Dryden—Clarendon Press Edition.</i>
	{	Modern History.

JUNIOR CLASS.

FIRST TERM.	{	LOGIC— <i>Lectures and Thomson.</i>
		SELECT GREEK TRAGEDIES.
		PHYSICS— <i>Snell's Olmsted, Whewell.</i>
		Lectures on Chemical Physics.
SECOND TERM.	{	RHETORIC— <i>Lectures, Whately and Herbert Spencer.</i>
		PHYSICS—Continued.
		CHEMISTRY— <i>Roscoe and Lectures.</i>
		Lectures on Chemical Physics.
THIRD TERM.	{	CICERO DE NATURA DEORUM.
		Lectures on Roman Philosophy.
		LONGINUS ON THE SUBLIME, OR ANALYTICAL CHEMISTRY.
		Lectures on Greek Literature.
		ASTRONOMY— <i>Norton.</i>
	{	Lectures on French and German Literature.

SENIOR CLASS.

FIRST TERM.	{	INTELLECTUAL PHILOSOPHY— <i>Lectures.</i>
		READINGS AND PRELECTIONS IN PLATO AND ARISTOTLE, OR ANALYTICAL CHEMISTRY, OR CIVIL ENGINEERING.
		Lectures on Greek Philosophy.
		ZOOLOGY AND PHYSIOLOGY— <i>Dalton and Lectures.</i>
		Lectures on the History of Art.
SECOND TERM.	{	INTELLECTUAL AND MORAL PHILOSOPHY.
		HISTORY OF CIVILIZATION IN EUROPE— <i>Lectures.</i>
		READINGS AND PRELECTIONS IN THE INSTITUTES OF JUSTINIAN, OR CIVIL ENGINEERING.
		Lectures on Roman Jurisprudence.
		Lectures on the History of Philosophy.
THIRD TERM.	{	CONSTITUTIONAL LAW AND POLITICAL ECONOMY— <i>Lectures and Blanqui.</i>
		STUDIES IN EARLY AND RECENT ENGLISH, OR WHITNEY ON LANGUAGE.
		GEOLOGY— <i>Lectures.</i>
		Lectures on Physical Geography.

SCIENTIFIC COURSE.

Students in this Course recite, so far as their studies coincide, with those in the Classical Department, using the same text-books.

FRESHMAN CLASS.

FIRST TERM.	{	ALGEBRA. LATIN. ANCIENT HISTORY— <i>Smith's Greece</i> . Phonetic Analysis and Phonography.
SECOND TERM.	{	ALGEBRA—Completed. GEOMETRY. LATIN. GREEK CLASSICS FOR ENGLISH READERS— <i>The Historians and Orators</i> . Vocal Culture.
THIRD TERM.	{	ENGLISH COMPOSITION. GREEK CLASSICS FOR ENGLISH READERS— <i>The Poets and Dramatists</i> . GEOMETRY AND TRIGONOMETRY. Elocution.

SOPHOMORE CLASS.

FIRST TERM.	{	SURVEYING, NAVIGATION and ANALYTICAL GEOMETRY. FRENCH. LATIN. English Language and Literature. Mediæval History.
SECOND TERM.	{	CALCULUS. GERMAN. MEDIÆVAL HISTORY— <i>Smith's Gibbon</i> . English Language and Literature.
THIRD TERM.	{	FRENCH. GERMAN. LATIN. English Language and Literature. Mediæval History.

UNIVERSITY OF ROCHESTER.

JUNIOR CLASS.

FIRST TERM.	{	LOGIC. ENGLISH LITERATURE— <i>Shaw</i> . PHYSICS. Lectures on Chemical Physics.
SECOND TERM.	{	RHETORIC. PHYSICS. CHEMISTRY. Lectures on Chemical Physics.
THIRD TERM.	{	ANALYTICAL CHEMISTRY. ASTRONOMY. LATIN. Lectures on French and German Literature.

SENIOR CLASS.

FIRST TERM.	{	INTELLECTUAL PHILOSOPHY. ZOOLOGY AND PHYSIOLOGY. CIVIL ENGINEERING, or ANALYTICAL CHEMISTRY. Lectures on the History of Art.
SECOND TERM.	{	INTELLECTUAL AND MORAL PHILOSOPHY. LATIN, or ADVANCED GERMAN, or CIVIL ENGINEERING. HISTORY OF CIVILIZATION. Lectures on the History of Philosophy.
THIRD TERM.	{	STUDIES IN EARLY AND RECENT ENGLISH, or WHITNEY ON LANGUAGE. GEOLOGY. CONSTITUTIONAL LAW AND POLITICAL ECONOMY. Lectures on Physical Geography.

CONSPLECTUS OF COLLEGE EXERCISES.

FIRST TERM.

CLASS.	HOOR.	INSTRUCTOR.	SUBJECT.	REMARKS.
Seniors . . .	9.15-10.15 10.15-11.15 10.15-11.15 11.15-12.15	Pres. ANDERSON..... Prof. KENDRICK..... Prof. LATTIMORE..... Prof. LATTIMORE.....	Mental Philosophy. Greek (<i>Plato</i>). Analytical Chemistry. Zoölogy and Physiology.	On Saturday, 9.15-10.15, the Seniors receive Lectures from President ANDERSON on the History of Art.
Juniors . . .	9.15-10.15 10.15-11.15 11.15-12.15	Prof. ROBINSON..... Prof. GILMORE..... Prof. KENDRICK.....	Physics. Logic. Greek (<i>Sophocles</i>).	On Saturday, 9.15-10.15, the Juniors receive Lectures from Prof. LATTIMORE on Chemical Physics.
Sophomores .	9.15-10.15 10.15-11.15 11.15 12.15	Prof. MOREY..... Prof. MIXER..... Prof. QUINBY.....	Latin (<i>Horace</i>). French. Surveying and Analytical Geometry.	On Monday, 11.15-12.15, the Sophomores receive Lectures from Prof. GILMORE on the English Language; On Saturday, 9.15-10.15, from Prof. ROBINSON on Medieval History.
Freshmen . .	9.15-10.15 10.15-11.15 11.15-12.15	Prof. MIXER..... Prof. ROBINSON..... Prof. MOREY.....	Greek (<i>Xenophon</i>). Algebra. Latin (<i>Livy</i>).	On Saturday, 9.15-10.15, the Freshmen receive Lectures from Prof. GILMORE on Phonetic Analysis and Phonography.

SECOND TERM.

CLASS.	HOUR.	INSTRUCTOR.	SUBJECT.	REMARKS.
Seniors . . .	9.15-10.15 10.15-11.15 10.15-11.15 11.15-12.15	Pres. ANDERSON..... Prof. MOREY..... Prof. LATTIMORE..... Pres. ANDERSON.....	Moral Philosophy. Roman Law (<i>Justinian</i>). Analytical Chemistry. History.	On Saturday, 9.15-10.15, the Seniors receive Lectures from Pres. ANDERSON on the History of Philosophy.
Juniors . . .	9.15-10.15 10.15-11.15 11.15-12.15	Prof. ROBINSON..... Prof. GILMORE..... Prof. LATTIMORE.....	Physics. Rhetoric. Chemistry.	On Saturday, 9.15-10.15, the Juniors receive Lectures from Prof. LATTIMORE on Chemical Physics.
Sophomores .	9.15-10.15 10.15-11.15 11.15-12.15	Prof. KENDRICK..... Prof. MIXER..... Prof. QUINBY.....	Greek (<i>Demosthenes</i>). German. Calculus.	On Monday, 9.15-10.15, the Sophomores meet Prof. GILMORE in English Literature; On Saturday, 9.15-10.15, Prof. ROBINSON in Mediaeval History.

Dalton's and Flint's Physiologies.
Dana's Manual of Geology.
Gray's Structural Botany and Manual.
Fleming's Vocabulary of Philosophy.
Murray's Hamilton.
Bledsoe's Philosophy of Mathematics.

General View of the Curriculum.

One who desires to understand the work which the University attempts to perform, may be referred to the tabular statements, already given, of the courses of study which are prescribed for students. It seems appropriate, however, that special attention be called to some features in the several departments of instruction.

THE DEPARTMENT OF METAPHYSICS.

Intellectual and Moral Philosophy are taught^{*} mainly by lectures. Propositions embodying an outline of these subjects, with a condensed discussion of each, are dictated to the class. Copious illustrations of the topics are then given, with full opportunities for questions and discussion on the part of the class, until the doctrine set forth is completely understood. The design of the course is to fix convictions in the student's mind regarding the reality, certainty and limits of human knowledge, and show that man has a moral and intellectual constitution, existing in the germ, before the processes of thought and action begin.

In furtherance of these objects, recourse is constantly had to the history of thought on the topics discussed, with a view to set forth the gradual progress, through the ages, toward definite and scientific conceptions of man's nature. Care is taken to put over against each truth taught, its antagonistic error; and, also, to select illustrations of these subjects from common life, so that

the student, in acquiring a knowledge of the mental and moral constitution of *man*, shall be, at the same time, gaining that practical knowledge of *men* which shall conduce to his success in the business, or profession, to which he looks forward.

THE CLASSICAL DEPARTMENT

Aims, by the careful reading of the Greek and Latin classics, and by assiduous practice in writing Greek and Latin prose, to give the student such familiarity with the classical tongues, as shall unlock to him the treasure-house of ancient thought and feeling; and, at the same time, fit him to acquire a more complete mastery of those modern languages which are so largely derived from a classical source. The Classics are studied not in a spirit of blind veneration for antiquity; but as illustrating the universal laws of language, as presenting the most perfect specimens of merely literary composition, and as laying open the sources from which have been derived invaluable elements in modern civilization. Special attention is given, on the one hand, to the historic development and the most important speculative results of Greek Philosophy; and, on the other, to the growth, the general principles, and the permanent influence of Roman Jurisprudence. The classics are further utilized by making them supplement other courses of study—Longinus, Plato and Cicero being read in connection with instruction in Rhetoric and Mental and Moral Philosophy.

THE DEPARTMENT OF HISTORY.

Although the Faculty of Instruction embraces no officer who is distinctively charged with the care of this department, an ample course of historical studies is provided for the student. Instruction is given in Greek and Roman History in connection

with the Classical Department. Mediæval History is taught in weekly lectures which cover three entire terms. The study of the English Language and Literature is necessarily approached from an ethnologic and historic point of view. In the Senior year an entire term is devoted to the study of History—lectures being given on Physical Geography, Ethnology, and on a series of fundamental topics which include an outline survey of the forces, moral and physical, that have resulted in modern civilization, and in the formation of the state system of Europe and America. Another term is divided between Political Economy and the Constitutional Law of England and the United States.

THE DEPARTMENT OF RHETORIC

Is regarded as an organic whole whose reciprocally dependent parts are:

1. The Laws of Thought, or *Logic*.
2. The Laws of Expression, or, in the abstract, *Rhetoric*, in the concrete, *Literature*—both, of course, presupposing, for the English student, a minute and thorough acquaintance with the *English Language*.
3. The Laws of Utterance, or *Elocution*.

In accordance with this conspectus, the student is taught from the outset of his college course, to analyze his mental processes and adapt his words to his thoughts, his tones and gestures to his words. Particular attention is paid to the study of the English Language in its origin and development, and in its use by such writers as Chaucer, Shakspeare, Bacon and Milton—whose works are studied with the same care as those of Horace, Sophocles, Plato and Homer.

In connection with this department, orations are pronounced before the University, by students in the third term of the

Junior, and the first and second terms of the Senior year—each student being required to prepare and deliver at least one oration in each term.

During the Freshman year, there is a regular weekly exercise in Phonetic Analysis, Phonography and Elocution. Members of the Junior and Sophomore classes are required to present original essays or oral dissertations twice, at least, in each term. These essays are freely used for class-room illustration of Rhetorical excellences and defects.

THE DEPARTMENT OF MODERN LANGUAGES

Embraces a course of at least two terms in French and two in German for every student who is a candidate for a degree.

While the philological study of these languages is held constantly in mind, such colloquial drill is given as may prepare the student for using them in the business of life.

THE DEPARTMENT OF MATHEMATICS.

During the first two years of the College Course, the classes have a continuous drill in Pure Mathematics, beginning with the generalizations of Higher Algebra, and closing with the Calculus. Then follow Mathematics as applied to Natural Philosophy and Astronomy. While the disciplinary exercises of the student are necessarily abstract, it is the design of the officers in charge of this department to show, by lectures and illustrations, that the formulas of Mathematics are the keys of natural phenomena, and that they underlie the practical arts of life. It is further believed that Mathematics, like Politics, are best learned in their historical development. The discovery and history of formulas are, therefore, made the frequent theme of class-room conversations.

THE DEPARTMENT OF NATURAL SCIENCE.

In the Department of Natural Science, instruction is given by Lectures. Zoölogy and Physiology are studied by the Senior Class during the first term. An outline of the general principles of Zoölogy, embracing the characteristics and methods of classification of the animal kingdom, is followed by a more special study of Human Physiology and Anatomy, with constant reference to the structure and functions of the inferior animals, seeking thus, by making it a study of comparisons and analogies, to develop the existence of a comprehensive plan in organic nature. Constant attention is given, in this department, to the principles of Hygiene.

During the first term, a course of lectures is given to the Junior Class on Chemical Physics, followed, during the second term, by a course of daily lectures on General Chemistry. The properties of the elementary bodies, and their more important combinations, are fully illustrated by experiments in the lecture room. Special attention is given to the economic and industrial applications of Chemical science. Frequent opportunities are afforded for visiting the various manufacturing establishments of the city, in which Chemical processes are practically applied.

During the third term, a course of daily lectures is given to the Senior Class on Geology, illustrated by Guyot's wall-maps and the extensive Lithological, Mineralogical and Palæontological Collections of the Cabinet, representing all the explored portions of the earth's crust.

ANALYTICAL LABORATORY.

To supplement the instruction given to undergraduates in General Chemistry, a Laboratory has been provided and

furnished with the requisite apparatus, for the use of those who may wish to pursue a more extended course of theoretical and practical Chemistry, by conducting their own experiments and investigations, under the direction of the Professor.

Special students will be admitted to the Laboratory for instruction in the theory and practice of Chemical Analysis, qualitative and quantitative, the application of Chemistry to Agriculture, Pharmacy, the Mechanic Arts, etc. For further particulars respecting this department, application may be made to the Professor of Chemistry.

MORAL AND RELIGIOUS CULTURE.

It is the aim of the Faculty, in connection with the discipline of the intellect, to inculcate a pure morality, and the great truths and duties of Christianity. The public duties of each day are opened at 9 o'clock A. M., with reading of the Scriptures and prayer, in the University Chapel. The students are required to attend, unless specially excused by the Faculty.

In the Greek Department there is a weekly recitation in the Greek New Testament.

Weekly prayer meetings are held under the auspices of the Young Men's Christian Association, in a room, centrally situated, which the Trustees have provided for that purpose; and, by each class, at the close of the Saturday morning recitation.

Parents and guardians are requested to designate places of worship, at which their sons, or wards, are expected regularly to attend on the Sabbath.

The Cabinets and Library.

GEOLOGY AND MINERALOGY.

These Cabinets, containing over 40,000 carefully selected specimens, are an encyclopædia of the sciences which they illustrate. They were collected by Professor WARD, during six years of extensive foreign travel, and during many careful visits to a large number of the most fruitful American localities. Having been compiled, from the first, upon a plan which contemplates the most complete illustration of every point in these two departments of inorganic nature, it is believed that they offer opportunities to students of these sciences, unsurpassed in the country.

The Cabinet of Geology commences with a collection of over 3,000 rocks, arranged in orders and families, in explanation of the science of Lithology. Every rock species, as recognized by the latest authors, is contained in this series; and all points of interest in technical or economic Geology are amply illustrated.

Another series of rocks presents those which are, to some extent, characteristic of the several Geological formations. Other series are Geographical in their character, and show the student the mineral composition of some typical Geological region.

The Lithological section of the Cabinet also contains a valuable series of rocks, collected by Prof. JAMES ORTON, illustrative of the Geology of the Andes.

The collections of Fossils are from the standard localities in Europe and America, and represent the animal and vegetable

life which covered the surface of our planet during each of the great Geologic periods.

A prominent feature of the Cabinet is, that it contains plaster copies, perfect in form and dimensions, of all the well-known genera of fossil quadrupeds.

A section of the Geological Cabinet embraces a series of models, maps, sections, ideal landscapes, and cuts of fossils, intended to illustrate the lectures which are given upon these subjects.

The Cabinet of Minerals is equally rich and comprehensive. It begins with several extensive series of specimens intended to illustrate the subjects of Crystallography, and the physical properties of minerals, and contains about 5,000 choice specimens, representing four-fifths of all the species known.

CABINET OF ARCHÆOLOGY.

The foundation has been laid for an Archæological Cabinet, by the purchase of a small, but well-authenticated collection of flint and bronze implements from the drift region of Abbéville and St. Acheul, in France. To this cabinet some specimens of the stone implements of the American Indians have been added; and it has also been enriched by a very choice collection of stone implements from the vicinity of Copenhagen—the genuineness of which is attested by the most eminent Danish archæologists. Contributions to this cabinet are respectfully requested.

LIBRARY.

The Library of the University is open daily, from 8 to 9 A. M., and on Saturday, from 10:15 to 12 A. M., for consultation and for the drawing of books. All the students have free access to the Library, and are aided in consulting it by the Librarian and

other members of the Faculty. Especial pains is taken by card-catalogues and indexes of periodical and miscellaneous literature, (all of which are brought down to date, and open to every student,) to make the contents of the Library practically available.

THE RATHBONE LIBRARY FUND,

The gift of Gen. John F. Rathbone, of Albany, amounts to twenty-five thousand dollars, the interest on which is appropriated to the increase of the Library. In the purchase of books, the preference is given to those works which are demanded by the officers and students for the successful prosecution of their inquiries in the various departments of study.

RECITATIONS AND EXAMINATIONS.

The recitations are held from 9:15 A. M. to 12:15, each class having three daily exercises of one hour. The number, or length, of these exercises may be increased at the discretion of the Faculty. On Saturday, the classes attend in the lecture-room but one hour; and that, rather for instruction than for recitation.

Examinations are conducted by a combination of written and oral exercises; and in the presence of a Committee of the Faculty. Students pursuing an Eclectic Course are required to pass the examinations of the departments with which they connect themselves. No student is admitted to examination whose absences, during the term, exceed a certain per-centage.

Examinations are held, on each study, at the close of the term during which it has been pursued. Examinations for delinquent students are held on the third Saturday after the beginning, and the third Saturday before the end, of each term.

PUBLIC EXERCISES.

1. Prize Declamations by the Sophomore Class, on the Monday evening preceding Commencement.
 2. Commencement, on the Wednesday preceding the Fourth of July.
-

EXPENSES.

The University has no dormitories, being conformed, in this respect, to the German, rather than the English model. Parents who send their sons to the University are recommended to secure for them, during their College course, the influence of a Christian home, so far as this is practicable. Rooms which afford ample accommodations for two students, can, however, be secured, in buildings designed especially for this purpose, for \$1.00 per week. Boarding can be obtained in private families for from \$3.50 to \$5.00 per week. The Janitor of the University will furnish its patrons with all necessary information respecting rooms and boarding.

Tuition, per term, including incidentals, \$25.00.

The rules established by the Trustees, with reference to the payment of tuition, *require the settlement of all bills at the beginning of each term*; that students in the Eclectic Course pay full tuition; and that orders for tuition on scholarships be presented as soon as received. No deduction is made for absence.

A large number of students find profitable employment in the city, in teaching private pupils and classes, and in various other occupations; thus enabling them to provide in considerable part, for the expenses of their education. Students who have practical

acquaintance with any of the useful arts, are able to procure constant and remunerative employment in the city.

Indigent students for the ministry, regularly approved by churches, receive assistance from the New York Baptist Union for Ministerial Education, and, under certain conditions, free tuition from the University, which has set apart 40 scholarships for this purpose.

Other indigent students, of good character, are occasionally assisted from funds at the disposal of the President.

Parents and guardians are earnestly requested to exercise a careful supervision over their sons, or wards, and to discriminate between necessary and unnecessary expenses. Experience proves that nothing has a more unfavorable influence upon a student's conduct and habits of study, than the unrestrained use of money.

PREMIUMS, EXTRA STUDIES, ETC.

THE DAVIS PRIZE MEDALS.

The sum of \$1,000 has been given to the funds of the University by the Hon. Isaac Davis, LL. D., of Worcester, Mass., the annual income of which is, by the direction of the donor, to be expended in purchasing two gold medals of unequal value, to be given to the two members of the graduating class whose orations, on Commencement Day, shall exhibit, respectively, the first and second grades of excellence in thought, composition and delivery combined.

THE STODDARD PRIZE MEDAL.

Professor John F. Stoddard—himself a distinguished Mathematical teacher and author—has given to the University the endowment for a gold medal of the value of one hundred dollars, which is to be awarded to the student in each graduating class, (having been three years a member of the University, and having maintained a good standing in all the studies of the curriculum) who shall have passed the best examination on the Mathematical studies of the entire course, and also on some special topic to be assigned by the Faculty; provided that such examination shall have attained to a certain absolute value.

The special topic on which the members of the present Senior Class will be examined, is: THE MATHEMATICAL AND THE EXPERIMENTAL CONSIDERATIONS IN FAVOR OF THE UNDULATORY THEORY OF LIGHT.

THE DAVIS SCHOLARSHIP.

A scholarship, yielding \$70 a year, for the benefit of some indigent student, has been founded by the Hon. Isaac Davis, LL. D. The income of this scholarship is now available under certain conditions, affecting character and standing, prescribed by the founder.

THE SHELDON SCHOLARSHIP.

By the liberality of Abraham Sheldon, Esq., of Adams Centre, free tuition has been provided forever for some student, who shall be approved by the Faculty as especially worthy of assistance. An adequate endowment for several similar scholarships has been pledged, and will shortly be available.

THE CITY SCHOLARSHIPS.

In recognition of the interest taken by the citizens of Rochester in the establishment of the University, twelve scholarships,

UNIVERSITY OF ROCHESTER.

which entitle their holders to free tuition, have been granted to the City of Rochester by the Board of Trustees. These scholarships, to the number of three in each class, are awarded as prizes for excellence in the studies of the Rochester City Schools, preparatory to college.

SENIOR PRIZE ESSAY.

A premium will be given to the member of each Senior Class who shall present the best essay upon a subject selected by the Faculty.

The subject for the present year is : SHAKSPEARE'S INDEBTEDNESS TO THE BIBLE.

THE DEWEY PRIZE DECLAMATIONS.

Premiums are given for the best exercises in Declamation, by members of the Sophomore Class—those students only being allowed to compete whose standing and deportment are especially approved by the Faculty. The funds for this purpose are derived from a bequest by the Rev. Dr. Beadle, of Philadelphia, a pupil and friend of the late Dr. Dewey.

EXTRA STUDIES WITH PREMIUMS.

Students whose absences do not exceed a certain per-centage, and whose scholarship in all departments reaches a certain fixed standard, are permitted to pursue studies additional to the required curriculum, with a view to competition for premiums.

JUNIOR CLASS.

A premium will be given to the member of the Junior Class who shall pass the best examination upon some portion of a Greek author, selected by the Faculty, which shall have been read in addition to the regular and required course of Greek studies.

UNIVERSITY OF ROCHESTER.

The examination for the present year will be on THE FIRST, SEVENTH, ELEVENTH, THIRTEENTH AND FIFTEENTH OF THE IDYLLS OF THEOCRITUS.

SOPHOMORE CLASS.

A premium will be given to the member of the Sophomore Class who shall pass the best examination upon some portion of a Latin author, selected by the Faculty, which shall have been read in addition to the regular and required course of Latin studies.

The examination for the present year will be on THE CAPTIVES OF PLAUTUS.

FRESHMAN CLASS.

A premium will be given to the member of the Freshman Class who shall pass the best examination in Mathematical studies, selected by the Faculty, in addition to the regular and required course of Mathematical studies.

The examination for the present year will be on OLNEY'S UNIVERSITY ALGEBRA—PART THIRD.

EXTRA STUDIES WITHOUT PREMIUMS.

Students whose absences do not exceed a certain per-centage, and whose scholarship in all departments is such, that their attention can be diverted from their regular studies without detriment, are encouraged to pursue studies additional to the required curriculum, under the direction of the Faculty, without competition for premiums. The successful prosecution of such studies—which will be tested by careful examinations—is distinguished by honorable reference in the annual catalogue of the University. The intention to study for Honorable Mention, and the course of study to be pursued, must be approved, in advance, by the Faculty; and no Honorable Mention will be given for studies which are not fairly equivalent, both in quantity and quality, to a daily recitation for one term in the department in which the student presents himself for honors.

Awards for the last Academic Year.

The following students are honorably distinguished for work done, beyond the requirements of the University, during the last academic year :

SENIOR CLASS.

The Stoddard Prize Medal, for excellence in Mathematics, was awarded to
GEORGE D. OLDS.

Committee of Award :

Prof. A. B. Evans,
Prof. Quinby.

The First Davis Medal, for the best oration on Commencement Day, including composition and delivery, was awarded to EBEN W. HUNT, and the Second Davis Medal to GEORGE D. OLDS.

Honorable Mention was made of ARTHUR WELLINGTON HORTON.

Committee of Award :

Prof. G. Anderson, D. D.,
Rev. N. M. Mann,
John N. Pomeroy, LL. D.

The Prize for the best essay on *The Literary and Political Significance of De Foe's Writings*, was awarded to GEORGE D. OLDS.

Committee of Award :

Pres. A. H. Strong, D. D.

UNIVERSITY OF ROCHESTER.

JUNIOR CLASS.

For an examination on the *Medea* of *Euripides* and the *Prometheus* of *Æschylus*, the First Premium was awarded to ALBERT FEARING CHADWICK, the Second to CHARLES B. PARKER.

Committee of Award :

N. W. Benedict, D. D.

HOMER C. BRISTOL is entitled to Honorable Mention for an examination on *Whately's Rhetoric* and *Blair's Rhetoric*.

ALBERT FEARING CHADWICK is entitled to Honorable Mention for an examination on *Jevons's Logic* and *Schuyler's Logic* ; and on *Heat and Magnetism* as treated by *Ganot*.

HORACE G. PIERCE is entitled to Honorable Mention for an examination on *Whately's Rhetoric*.

SOPHOMORE CLASS.

For Excellence in Declamation, the First Prize was awarded to J. WEED MUNRO ; the Second, to A. FRANK JENKS ; the Third, to FRANK H. ROWLEY.

Honorable Mention was made of LUTHER EMMETT HOLT, J. SLOAT FASSETT and C. RICHARD WILLIAMS.

Committee of Award :

J. W. Stebbins, Esq.,

Rev. Asa Saxe, D. D.,

A. A. Hopkins, Esq.

For an examination on the *Republic* of *Cicero*, the First prize was awarded to C. RICHARD WILLIAMS, and the Second was equally divided between J. SLOAT FASSETT and FRANCIS R. WELLES.

Committee of Award :

E. H. Wilson, A. M.

FRANCIS R. WELLES is entitled to Honorable Mention for an examination on fifty chapters of the second book of *Herodotus*, and the *Prometheus Vincetus* of *Æschylus*.

UNIVERSITY OF ROCHESTER.

FRESHMAN CLASS.

For an examination on *Davies' Bourdon's Algebra*, the First Prize was awarded to JOHN B. CALVERT.

Committee of Award:

Edward Webster, Esq.

JOSEPH T. ALLING is entitled to Honorable Mention for an examination on the *Memorabilia of Xenophon*, first, second and fourth chapters of the first book and second chapter of the third book.

FRANK J. BELLAMY is entitled to Honorable Mention for an examination on thirty-five of the select letters of *Cicero*.

BURTON MACAFEE is entitled to Honorable Mention for an examination on the second and third Olynthiac orations of *Demosthenes*.

FREDERICK P. WILCOX is entitled to Honorable Mention for an examination on the third book of *Quintus Curtius*, the *De Amicitia*, and the oration *Pro Marco Marcello* of *Cicero*, and *Suetonius's* Life of Otho.

THE LIBRARY OF THE
APR 9 1931

UNIVERSITY OF ROCHESTER.

VACATIONS.

1. Of ten days, including the Winter Holidays.
2. Of one week, from the end of the Second Term.
3. Of eleven weeks, immediately after Commencement.

The College Exercises are suspended on :

The Day of General Election for the State of New York.
Thanksgiving Day.

The Day of Prayer for Colleges.

Washington's Birth-Day.

Decoration Day.

The Anniversary of the Rochester Theological Seminary.

CALENDAR.

Organization.

THREE courses of study are open to the members of the University :

I. THE CLASSICAL COURSE, extending through four years ; at the expiration of which time, those who have satisfactorily met the requirements of the Faculty are admitted to the degree of Bachelor of Arts.

II. THE SCIENTIFIC COURSE, extending through four years—requiring no Greek, and only so much of Latin as is essential to the successful prosecution of the Modern Languages and the mastery of Scientific Terminology. In the place of Greek and Latin, a more extended course of study is prescribed in Physical Science, Mathematics, History, and the Modern Languages. Those who satisfactorily complete this course, are admitted to the degree of Bachelor of Science.

III. THE ECLECTIC COURSE, designed for students who may desire to receive instruction in particular departments, without becoming candidates for degrees. Such students are admitted, provided they have the requisite preparation for the studies of those departments and become subject to the laws of the University. This arrangement is intended to meet the wants of those whose age, or circumstances, may prevent them from pursuing either of the regular courses, but who are desirous of obtaining the liberal culture which the studies of a portion of the course will give them. Special care is taken to give such pupils the instruction which they require.

REQUIREMENTS FOR ADMISSION.

Candidates for admission to the University are expected to furnish satisfactory testimonials respecting character; and—if from other colleges—certificates of regular dismissal.

No person will be admitted to the Freshman Class who has not completed his fourteenth year; or to an advanced standing, without a corresponding advance in age.

The Monday and Tuesday before Commencement and the Wednesday before the opening of the following term, are the regular times for examining candidates. Examinations may take place at other times at the discretion of the Faculty.

The requirements for admission are as follows :

FOR THE CLASSICAL COURSE.

English Grammar and Composition; Colton's Common School Geography; Swinton's Condensed History of the United States; Robinson's Arithmetic; Robinson's University Algebra—to Quadratic Equations; Robinson's Geometry—six books; Harkness's, or Allen and Greenough's, Latin Grammar; Four books of Cæsar's Commentaries; Four Orations of Cicero—of which one shall be that for the Poet Archias, and one, that for the Manilian Law; Six books of Virgil's *Æneid*; and 39 sections of Arnold's Latin Prose Composition; Hadley's, or Crosby's, Greek Grammar; Three books of Xenophon's *Anabasis*, and one book of Homer's *Iliad*.

UNIVERSITY OF ROCHESTER.

Notice is given that, after the present year, applicants for admission to the University, will be examined in Prof. Gilmore's "Art of Expression."

FOR THE SCIENTIFIC COURSE.

The same as for the Classical Course, with the exception of the requirements in Greek.

FOR THE ECLECTIC COURSE.

Sufficient preparation to profit by the instruction given to any existing class.

A fair equivalent for the above requirements will, of course, be accepted, but candidates for admission are advised to conform, literally, to the requirements of the catalogue. Upon their examination for entrance, and in their subsequent instruction, it will be taken for granted that they have done so.

Those who wish to pursue studies in the city or vicinity, preparatory to admission to the University, will find ample facilities for doing so, under the advice and direction of the Faculty.

Any student who may be admitted to the University under conditions; as, also, any student who, after admission, may have shown himself deficient in any department of study, will be required to make up his deficiencies under a private tutor, who shall be selected by the Faculty. All existing deficiencies of this nature will be noted in the catalogue.

Courses of Instruction.

CLASSICAL COURSE.

FRESHMAN CLASS.

FIRST TERM.	<div>LIVY—<i>Lincoln</i>. Latin Prose Composition—<i>Arnold</i>. THE MEMORABILIA OF XENOPHON. Greek Ollendorf—<i>Kendrick</i>. ALGEBRA—<i>Robinson</i>. Phonetic Analysis and Vocal Culture—<i>Monroe</i>.</div>
SECOND TERM.	<div>LIVY. Latin Prose Composition—completed. SELECTIONS FROM THE GREEK HISTORIANS. Greek Ollendorf—completed. ALGEBRA—completed. GEOMETRY—<i>Robinson</i>. Lectures on Elocution.</div>
THIRD TERM.	<div>THE ILIAD OF HOMER. GEOMETRY AND TRIGONOMETRY—<i>Robinson</i>. THE ART OF EXPRESSION—<i>Gilmore</i>. Class Room Declamations.</div>

FIRST TERM.

LOGIC—*Lectures.*
SELECT GREEK TRAGEDIES.
PHYSICS—*Snell's Olmsted and Lectures.*
Lectures on Chemical Physics.

SECOND TERM.

RHETORIC—*Lectures.*
PHYSICS—Continued.
CHEMISTRY—*Lectures.*
Lectures on Chemical Physics.

THIRD TERM.

CICERO DE OFFICIIS.
Lectures on Roman Philosophy.
LONGINUS ON THE SUBLIME, OR ANALYTICAL CHEMISTRY.
Lectures on Greek Literature.
ASTRONOMY—*Loomis and Lectures.*
Lectures on French and German Literature.

SENIOR CLASS.

FIRST TERM.

INTELLECTUAL PHILOSOPHY—*Lectures.*
READINGS AND PRELECTIONS IN PLATO AND ARISTOTLE, OR
ANALYTICAL CHEMISTRY.
Lectures on Greek Philosophy.
ZOÖLOGY AND PHYSIOLOGY—*Lectures.*
Lectures on the History of Art.

SECOND TERM.

INTELLECTUAL AND MORAL PHILOSOPHY.
HISTORY OF CIVILIZATION IN EUROPE—*Lectures.*
READINGS AND PRELECTIONS IN THE INSTITUTES OF
JUSTINIAN.
Lectures on Roman Jurisprudence.
Lectures on the History of Art.

THIRD TERM.

CONSTITUTIONAL LAW AND POLITICAL ECONOMY—*Lectures.*
STUDIES IN EARLY AND RECENT ENGLISH, OR WHITNEY
ON LANGUAGE.
GEOLOGY—*Lectures.*
Lectures on Physical Geography.

SCIENTIFIC COURSE.

Students in this course recite, so far as their studies coïncide, with those in the Classical Department, using the same text-books.

General View of the Curriculum.

One who desires to understand the work which the University attempts to perform, may be referred to the tabular statement, already given, of the courses of study which are prescribed for students. It seems appropriate, however, that special attention be called to some features in the several departments of instruction.

THE DEPARTMENT OF METAPHYSICS.

Intellectual and Moral Philosophy are taught mainly by lectures. Propositions, embodying an outline of these subjects, with a condensed discussion of each, are dictated to the class. Copious illustrations of the topics are then given, with full opportunities for question and discussion on the part of the class, until the doctrine set forth is completely understood. The design of the course is to fix convictions in the student's mind regarding the certainty, and necessary limits, of human knowledge; and show that man has a moral and intellectual constitution, existing, in the germ, before the processes of thought and action begin.

In furtherance of these objects, recourse is constantly had to the history of thought on the topics discussed, with a view to set forth the gradual progress in this direction toward definite and scientific conceptions of man's nature. Care is taken to put over against each truth taught, its antagonistic error; and also to select illustrations of these subjects from common life, so that the student, in acquiring a knowledge of the mental and moral constitution of *man*, shall be, at the same time, gaining that practical

knowledge of *men* which shall conduce to his success in the business, or profession, which he proposes to enter.

THE CLASSICAL DEPARTMENT

aims, by the careful reading of the Greek and Latin classics, and by assiduous practice in writing Greek and Latin prose, to give the student such familiarity with the Classical tongues, as shall unlock to him the treasure-house of ancient thought and feeling; and, at the same time, fit him to acquire a more complete mastery of those modern languages which are so largely derived from Classical sources. The Classics are studied not in a spirit of blind veneration for antiquity; but as illustrating the universal laws of language, as presenting the most perfect specimens of literary composition, and as laying open the sources from which have been derived invaluable elements in modern civilization. Special attention is given, on the one hand, to the historic development and the most important speculative results of Greek Philosophy; and, on the other, to the growth, the general principles, and the permanent influence of Roman Jurisprudence. The Classics are further utilized by making them supplement other courses of study—Longinus, Plato and Cicero being read in connection with instruction in Rhetoric and Mental and Moral Philosophy.

THE DEPARTMENT OF HISTORY.

Although the Faculty of Instruction embraces no officer who is distinctively charged with the care of this department, an ample course of historical studies is provided for the student. Instruction is given in Greek and Roman History in connection with the Classical Department. Mediæval History is taught in weekly lectures which cover three entire terms. The study of the English Language and Literature is necessarily approached from an Ethnologic and Historic point of view. In every department of instruc-

tion, indeed, especial attention is given to the origin and development of the science taught: so that the methods of Historic investigation are constantly applied and exemplified. During the Senior year, an entire term is devoted to the study of History—lectures being given on Physical Geography, Ethnology, and on a series of fundamental topics which include an outline survey of the forces, moral and physical, that have resulted in modern civilization, and in the formation of the state systems of Europe and America. Another term is divided between Political Economy and the Constitutional Law of England and the United States.

THE DEPARTMENT OF RHETORIC

is regarded as an organic whole whose reciprocally dependent parts are :

1. The Laws of Thought, or *Logic*.

2. The Laws of Expression, or, in the abstract, *Rhetoric*; in the concrete, *Literature*—both, of course, presupposing, for the English student, a minute and thorough acquaintance with the *English Language*.

3. The Laws of Utterance, or *Elocution*.

In accordance with this conspectus, the student is taught, from the very outset of his course, to analyze his mental processes and adapt his words to his thoughts; his tones and gestures to his words. Particular attention is paid to the study of the English Language in its origin and development, and in its use by such writers as Chaucer, Shakspeare, Bacon and Milton—whose works are studied with the same care as those of Horace, Sophocles, Plato and Homer.

In connection with this department, orations are delivered before the University, by students in the third term of the Junior,

and the first and second terms of the Senior year—each student being required to prepare and deliver at least one oration in each term.

During the Freshman year, there is a regular weekly exercise in Phonetic Analysis and Elocution. Members of the Junior and Sophomore classes are required to present original essays, or oral dissertations, twice, at least, in each term. These essays are freely used for class-room illustration of Rhetorical excellences and defects.

DEPARTMENT OF MODERN LANGUAGES.

This department embraces a course of at least two terms in French, and two in German, for every student who is a candidate for a degree.

While the philological study of these languages is held constantly in mind, such colloquial drill is given as may prepare the student for using them in the business of life.

THE DEPARTMENT OF MATHEMATICS.

During the first two years of the regular course, the classes have a continuous drill in Pure Mathematics, beginning with the generalizations of higher Algebra, and closing with the Calculus. Then follow Mathematics as applied to Natural Philosophy and Astronomy. While the disciplinary exercises of the student are necessarily abstract, it is the design of the officers in charge of this department to show, by lectures and illustrations, that the formulas of Mathematics are the keys of natural phenomena, and that they underlie the practical arts of life. It is further believed that Mathematics, like Politics, are best studied in their historical development. The discovery and history of formulas are, therefore, made the frequent theme of class-room conversation.

DEPARTMENT OF NATURAL SCIENCE.

In the Department of Natural Science, instruction is given mainly by lectures. Zoölogy and Physiology are studied by the Senior Class during the first term. An outline of the general principles of Zoölogy, embracing the characteristics and methods of classification of the Animal Kingdom, is followed by a more special study of Human Physiology and Anatomy, with constant reference to the structure and functions of the inferior animals, seeking thus, by making it a study of comparisons and analogies, to develop the existence of a comprehensive plan in organic nature. Constant attention is given, in this department, to the principles of Hygiene.

During the third term, the Senior Class receive a course of daily lectures on Geology, illustrated by the extensive Lithological, Mineralogical and Palæontological Collections of the Cabinet, representing all the explored portions of the earth's crust.

DEPARTMENT OF CHEMISTRY.

During the first term, a course of lectures is given on Chemical Physics to the Junior Class, followed, during the second term, by a course of daily lectures on General Chemistry. The properties of the elementary bodies, and their more important combinations, are fully illustrated by experiments in the lecture room. Special attention is given to the economic and industrial applications of Chemical Science. Frequent opportunities are afforded for visiting the various manufacturing establishments of the city, in which Chemical processes are practically applied.

To supplement the instruction given to undergraduates in General Chemistry, a Laboratory has been provided and furnished with the requisite apparatus, for the use of those who may wish to pursue a more extended course of theoretical and practical Chem-

istry, by conducting their own experiments and investigations, under the direction of the professor. This Laboratory has recently been enlarged and re-fitted, to meet the increasing demands upon it.

Special students are admitted to the Laboratory for instruction in the theory and practice of Chemical Analysis, qualitative and quantitative; the application of Chemistry to Agriculture, Pharmacy, the Mechanic Arts, etc. For further particulars respecting this department, application may be made to the Professor of Chemistry.

MORAL AND RELIGIOUS CULTURE.

It is the aim of the Faculty, in connection with the discipline of the intellect, to inculcate a pure morality, and those truths and duties concerning which all Christians are agreed. The public duties of each day are opened at 9 o'clock A. M., with reading of the Scriptures, singing and prayer, in the University Chapel. The students are required to attend, unless specially excused by the Faculty.

In the Greek Department there is a weekly recitation in the Greek New Testament.

Weekly prayer meetings are held under the auspices of the Young Men's Christian Association, in a room, centrally situated, which the Trustees have provided for that purpose. Prayer meetings are also held by each class, at the close of the Saturday morning recitation.

Parents and guardians are requested to designate places of worship, at which their sons, or wards, are expected to attend regularly on the Sabbath.

The Cabinets and Library.

GEOLOGY AND MINERALOGY.

These Cabinets, containing over 40.000 carefully selected specimens, are an encyclopædia of the sciences which they illustrate. They were collected by Professor Ward, during ten years of extensive foreign travel, and during many careful visits to a large number of the most fruitful American localities. Having been compiled, from the first, upon a plan which contemplated the most complete illustration of every point in these two departments of inorganic nature, it is believed that they offer opportunities to students of these sciences, unsurpassed in this country.

The Cabinet of Geology commences with a collection of over 3.000 rocks, arranged in orders and families, in explanation of the science of Lithology. Every rock species, as recognized by the latest authors, is contained in this series ; and all points of interest in technical, or economic, Geology are amply illustrated.

Another series of rocks illustrates the several Geologic formations. Other series are Geographic in their character, and show the student the mineral composition of some typical Geographic region.

The Lithologic section of the cabinet also contains a valuable series of rocks, collected by Prof. James Orton—now of Vassar College—illustrative of the Geology of the Andes.

The collections of fossils are from the standard localities in Europe and America, and represent the animal and vegetable life

which covered the surface of the earth during each of the great Geologic periods.

A prominent feature of the Cabinet consists in its plaster copies, perfect in form and dimensions, of all the well known genera of fossil quadrupeds.

A section of the Geologic Cabinet embraces a series of models, maps, sections, ideal landscapes, and cuts of fossils, intended to illustrate the lectures which are given upon these subjects.

The Cabinet of Minerals is equally rich and comprehensive. It begins with several extensive series of specimens intended to illustrate the subject of Crystallography and the physical properties of minerals; and contains about 5,000 choice specimens, representing four-fifths of all the species known.

CABINET OF ARCHÆOLOGY.

The foundation has been laid for a Cabinet of Archæology by the purchase of a small, but well-authenticated, collection of flint and bronze implements from the drift region of Abbéville and St. Acheul, in France. To this cabinet some specimens of the stone implements of the American Indians have been added; and it has also been enriched by a very choice collection of stone implements from the vicinity of Copenhagen—the genuineness of which is attested by the most eminent Danish archæologists. During the past year, the value of this Cabinet has been enhanced by the addition of numerous specimens of pottery from the tombs of the Incas.

LIBRARY.

The Library of the University is open daily, from 8 to 9 A. M., and on Saturday, from 10:15 to 12 A. M., for consultation and for

the drawing of books. All the students have access to the Library, and are aided in consulting it by the Librarian and other members of the Faculty. The Library contains 12,000 carefully selected volumes, and especial pains is taken to make its contents practically available by card-catalogues and indexes of periodical and miscellaneous literature—all of which are brought down to date, and accessible to every student.

The Library of the Rochester Theological Seminary is freely accessible to students of the University.

THE RATHBONE LIBRARY FUND,

the gift of Gen. John F. Rathbone, of Albany, amounts to twenty-five thousand dollars, and will, it is expected, be largely increased on the completion of the Sibley Library Building. In the purchase of books, preference is given to those works which are demanded by the officers and students for the successful prosecution of their inquiries in the various departments of study.

RECITATIONS AND EXAMINATIONS.

Recitations are held from 9:15 to 12:15 A. M.—each class having three daily exercises of one hour. The number, or length, of these exercises may be increased at the discretion of the Faculty. On Saturday, the classes attend in the lecture-room but one hour; and that, rather for instruction than for recitation.

Examinations are conducted by a combination of written and oral exercises; and in the presence of a Committee of the Faculty. Students pursuing an Eclectic Course are required to pass the

examinations of the departments with which they connect themselves. No student is admitted to examination whose absences, during the term, exceed twenty per cent. of the exercises of the department in which he presents himself for examination.

Examinations are held, on each study, at the close of the term during which it has been pursued. Examinations for delinquent students are held on the third Saturday after the beginning, and the third Saturday before the end, of each term.

PUBLIC EXERCISES.

1. Prize Declamations by the Sophomore Class, on the Monday evening preceding Commencement.

2. Commencement, on the Wednesday preceding the Fourth of July.

EXPENSES.

The University has no dormitories, conforming, in this respect, to the German, rather than the English model. Those who send their sons, or wards, to the University, are recommended to secure for them, so far as practicable, the influence of a Christian home. Unfurnished rooms, which afford suitable accommodations for two students, can, however, be secured for \$1.00 per week. The average price paid for a furnished room, suitable for two students, is about \$2.00 per week. Boarding can be obtained in private families for from \$3.50 to \$5.00 per week. The Janitor

of the University will furnish its patrons with all necessary information respecting rooms and boarding.

Tuition, per term, including incidentals, \$25.00.

The rules established by the Trustees, with reference to the payment of tuition, *require the settlement of all bills at the beginning of each term*; that students in the Eclectic course pay full tuition; and that orders for tuition on scholarships be presented as soon as received. No deduction is made for absence.

A large number of students find profitable employment in the city, in teaching private pupils and classes, and in various other occupations—thus enabling them to provide, in considerable part, for the expenses of their education. Students who have practical acquaintance with any of the useful arts, are able to procure constant and remunerative employment in the city.

Indigent students for the ministry, regularly approved by churches, receive assistance from the *New York Baptist Union for Ministerial Education*, and, under certain conditions, free tuition from the University, which has set apart forty scholarships for this purpose.

Other indigent students, of good character, are occasionally assisted from funds at the disposal of the President.

Parents and guardians are earnestly requested to exercise a careful supervision over their sons, or wards, and to discriminate between necessary and unnecessary expenses. Experience proves that nothing has a more unfavorable influence upon a student's conduct and habits of study, than the unrestrained use of money.

PRIZES, EXTRA STUDIES, ETC.

THE DAVIS PRIZE MEDALS.

The sum of \$1.000 has been given to the University by the Hon. Isaac Davis, LL. D., of Worcester, Mass., the annual income of which is, by the direction of the donor, to be expended in purchasing two gold medals of unequal value, to be given to the two members of the graduating class whose orations, on Commencement Day, shall exhibit, respectively, the first and second grades of excellence in thought, composition and delivery combined.

THE STODDARD PRIZE MEDAL.

Professor John F. Stoddard—himself a distinguished Mathematical instructor—has given to the University the endowment for a gold medal of the value of one hundred dollars, which is to be awarded to the student in each graduating class, (having been three years a member of the University, and having maintained a good standing in all the studies of the curriculum,) who shall, immediately previous to graduation, have passed the best examination on the Mathematical studies of the entire course, and also on some special topic to be assigned by the Faculty—provided that such examination shall have attained to a certain absolute value.

The special topic on which the members of the present Senior Class will be examined, is: THE THEORY AND USES OF THE PENDULUM.

THE DAVIS SCHOLARSHIP.

A scholarship, yielding seventy dollars a year, for the benefit of some indigent student, has been founded by the Hon. Isaac Davis, LL. D. The income of this scholarship is now available under certain conditions, affecting character and standing, prescribed by the founder.

THE SHELDON SCHOLARSHIP.

By the liberality of Abraham Sheldon, Esq., of Adams Centre, free tuition has been provided forever for some student, who shall be approved by the Faculty as especially worthy of assistance.

THE JOHNSON SCHOLARSHIP.

A similar scholarship has recently been established by the children of the late Elias Johnson, Esq., of Troy.

THE CITY SCHOLARSHIPS.

In recognition of the interest taken by the citizens of Rochester in the establishment of the University, twelve scholarships, which entitle their holders to free tuition, have been granted to the City of Rochester by the Board of Trustees. These scholarships, to the number of three in each class, are awarded as prizes for excellence in the studies of the Rochester City Schools, preparatory to college.

SENIOR PRIZE ESSAY.

A prize will be given to the member of each Senior Class, of approved scholarship, who shall, on the first Monday in the third term, present the best essay upon a subject selected by the Faculty.

The subject for the present year is: WORDSWORTH'S PLACE IN LITERATURE.

POST GRADUATE SCHOLARSHIPS.

During the past year, the University has received from Isaac Sherman, Esq., of New York, the sum of \$5.000, the interest of which is to be applied to the support of some member of each graduating class (to be selected by competitive examination) while engaged in post-graduate studies, under the supervision of the Faculty, in the Department of Political Economy. More specific statements with reference to this scholarship will be made in the next Catalogue. For the present year, the income of THE SHERMAN SCHOLARSHIP will, with the permission of its founder, be devoted to the purchase of books in the Department of Political Economy.

It is anticipated that the sum of three hundred dollars *per annum* will, within the present year, be made available, by another friend of the University, for a similar Scholarship in the Department of Constitutional Law and the History of Political Institutions.

THE DEWEY PRIZE DECLAMATIONS.

Prizes are given for the best exercises in Declamation, by members of the Sophomore Class—those students only being allowed to compete whose standing and deportment are especially approved by the Faculty. The funds for this purpose are derived from a bequest by the Rev. Dr. Beadle, of Philadelphia, a pupil and friend of the late Dr. Dewey.

EXTRA STUDIES WITH PRIZES.

Students whose attendance and deportment are entirely satisfactory, and whose scholarship, in all departments, reaches a certain fixed standard, are permitted to pursue studies additional to the required curriculum, with a view to competition for prizes.

JUNIOR CLASS.

A prize will be given to the member of the Junior Class who shall pass the best examination upon some portion of a Greek author, selected by the Faculty, which shall have been read in addition to the regular and required course of Greek studies.

The examination for the present year will be on SELECTIONS FROM FELTON'S MODERN GREEK WRITERS, with an essay on the Distinctive Characteristics of the Modern Greek Language.

SOPHOMORE CLASS.

A prize will be given to the member of the Sophomore Class who shall pass the best examination upon some portion of a Latin author, selected by the Faculty, which shall have been read in addition to the regular and required course of Latin studies.

The examination for the present year will be on THE FOURTH BOOK OF THE DE CIVITATE DEI OF AUGUSTINE, with an essay on the Influence of Christianity on the Latin Language.

FRESHMAN CLASS.

A prize will be given to the member of the Freshman Class who shall pass the best examination upon some branch of

Mathematical study, selected by the Faculty, in addition to the regular and required course.

The examination for the present year will be on SYMMETRICAL FUNCTIONS OF ROOTS AND THEORY OF ELIMINATIONS, as developed in Todhunter's *Theory of Equations*.

EXTRA STUDIES WITHOUT PRIZES.

Students whose attendance and deportment are entirely satisfactory, and whose scholarship, in all departments, is such that their attention can be diverted from their regular studies without detriment, are encouraged to pursue studies additional to the required curriculum, under the direction of the Faculty, without competition for prizes. The successful prosecution of such studies—which will be tested by careful examination—is distinguished by honorable reference in the annual catalogue of the University. The intention to study for Honorable Mention, and the course of study to be pursued, must be approved, in advance, by the Faculty; and no Honorable Mention will be given for studies which are not fairly equivalent, both in quantity and quality, to a daily recitation for one term in the department in which the student presents himself for honors.

Awards for the last Academic Year.

SENIOR CLASS.

The following students are honorably distinguished for work done, beyond the requirements of the University, during the last academic year :

The Stoddard Prize Medal, for excellence in Mathematics, was awarded to SPENCER HEDDEN FREEMAN.

Committee of Award :

Prof. A. B. Evans,
Prof. Quinby.

The First Davis Medal, for the best oration on Commencement Day, including composition and delivery, was awarded to A. FRANK JENKS ; and the Second Davis Medal, to J. WEED MUNRO.

Committee of Award :

Rev. S. S. Cutting, D. D.,
Chas. E. Fitch, Esq.,
C. C. Merriman, Esq.

The Prize for the best essay on *Journalism*, was awarded to JACOB SLOAT FASSETT.

Honorable Mention was made of JAMES W. WHITE and FRANCIS R. WELLES.

Committee of Award :

Rezin A. Wight, Esq.,
John R. Howard,
Rossiter Johnson.

UNIVERSITY OF ROCHESTER.

JUNIOR CLASS.

For an examination on the *First and Second Books of Aristotle's Politics*, the First Prize was awarded to JOHN BETTS CALVERT; the Second, to FRED. AUGUSTUS VANDERBURGH.

Committee of Award:

Prof. F. B. Palmer.

FRED. AUGUSTUS VANDERBURGH is entitled to Honorable Mention for an examination on Jevons's Logic, Fowler's Inductive Logic, and Whately's Rhetoric.

SOPHOMORE CLASS.

For Excellence in Declamation, the First Prize was awarded to THEODORE A. LEMEN; and two Second Prizes to JAMES D. SQUIRES and LUTHER M. HAIR. Honorable Mention was made of EDMUND LYON.

Committee of Award:

Rev. A. J. Sage, D. D.,

Rev. C. B. Gardner,

Prof. S. C. Pierce.

For an examination on the *De Legibus of Cicero*, the First Prize was awarded to EUGENE C. AKIN; the Second, to JOHN E. BROWN.

Honorable Mention was made of CHAS. E. DARROW and C. N. DOUGLASS.

Committee of Award:

Prof. D. S. Benjamin.

UNIVERSITY OF ROCHESTER.

FRESHMAN CLASS.

For an examination on *The Nature and Composition of Equations*, the First Prize was equally divided between RANSOM HARVEY and GEORGE F. SLOCUM.

Honorable Mention was made of ROBERT BARDWELL WICKES.

Committee of Award :

Prof. H. G. Burlingame.

GEORGE F. FLANNERY is entitled to Honorable Mention for an examination on *Nepos's Lives*.

WILLIAM H. DEXTER is entitled to Honorable Mention for an examination on a course of reading in the History of Arithmetic, Algebra and Geometry.

VACATIONS.

1. Of ten days, including the Christmas Holidays.
2. Of one week, from the end of the Second Term.
3. Of eleven weeks, immediately after Commencement.

The College Exercises are suspended on :

The Day of General Election for the State of New York.

Thanksgiving Day.

The Day of Prayer for Colleges.

Washington's Birth-Day.

Decoration Day.

The Anniversary of the Rochester Theological Seminary.

CALENDAR.

1875-6.

FIRST TERM ENDS.....	December 23.
SECOND TERM BEGINS.....	January 4.
DAY OF PRAYER FOR COLLEGES.....	January 27.

Organization.

THREE courses of study are open to the members of the University :

I. THE CLASSICAL COURSE, extending through four years ; at the expiration of which time, those who have satisfactorily met the requirements of the Faculty are admitted to the degree of Bachelor of Arts.

II. THE SCIENTIFIC COURSE, extending through four years—requiring no Greek, and only so much of Latin as is essential to the successful prosecution of the Modern Languages and the mastery of Scientific Terminology. In the place of Greek and Latin, a more extended course of study is prescribed in Physical Science, Mathematics, History, and the Modern Languages. Those who satisfactorily complete this course, are admitted to the degree of Bachelor of Science.

III. THE ECLECTIC COURSE, designed for students who may desire to receive instruction in particular departments, without becoming candidates for degrees. Such students are admitted, provided they have the requisite preparation for the studies of those departments and become subject to the laws of the University. This arrangement is intended to meet the wants of those whose age, or circumstances, may prevent them from pursuing either of the regular courses, but who are desirous of obtaining the liberal culture which the studies of a portion of the course will give them. Special care is taken to give such pupils the instruction which they require.

REQUIREMENTS FOR ADMISSION.

Candidates for admission to the University are expected to furnish satisfactory testimonials respecting character; and—if from other colleges—certificates of regular dismissal.

No person will be admitted to the Freshman Class who has not completed his fourteenth year; or to an advanced standing, without a corresponding advance in age.

The Monday and Tuesday before Commencement and the Wednesday before the opening of the following term, are the regular times for examining candidates. Examinations may take place at other times at the discretion of the Faculty.

The requirements for admission are as follows :

FOR THE CLASSICAL COURSE.

English Grammar and Composition; Colton's Common School Geography; Swinton's Condensed History of the United States; Robinson's Arithmetic; Robinson's University Algebra—to Quadratic Equations; Robinson's Geometry—six books; Harkness's, or Allen and Greenough's, Latin Grammar; Four books of Cæsar's Commentaries; Four Orations of Cicero—of which one shall be that for the Poet Archias, and one, that for the Manilian Law; Six books of Virgil's *Æneid*; and 39 sections of Arnold's Latin Prose Composition; Hadley's, or Crosby's, Greek Grammar; Three books of Xenophon's *Anabasis*, and one book of Homer's *Iliad*.

UNIVERSITY OF ROCHESTER.

Notice is given that, after the present year, applicants for admission to the University, will be examined in Prof. Gilmore's "Art of Expression."

FOR THE SCIENTIFIC COURSE.

The same as for the Classical Course, with the exception of the requirements in Greek.

FOR THE ECLECTIC COURSE.

Sufficient preparation to profit by the instruction given to any existing class.

A fair equivalent for the above requirements will, of course, be accepted, but candidates for admission are advised to conform, literally, to the requirements of the catalogue. Upon their examination for entrance, and in their subsequent instruction, it will be taken for granted that they have done so.

Those who wish to pursue studies in the city or vicinity, preparatory to admission to the University, will find ample facilities for doing so, under the advice and direction of the Faculty.

Any student who may be admitted to the University under conditions; as, also, any student who, after admission, may have shown himself deficient in any department of study, will be required to make up his deficiencies under a private tutor, who shall be selected by the Faculty. All existing deficiencies of this nature will be noted in the catalogue.

Courses of Instruction.

CLASSICAL COURSE.

FRESHMAN CLASS.

FIRST TERM.

LIVY—*Lincoln*.
Latin Prose Composition—*Arnold*.
THE MEMORABILIA OF XENOPHON.
Greek Ollendorf—*Kendrick*.
ALGEBRA—*Robinson*.
Phonetic Analysis and Vocal Culture—*Monroe*.

SECOND TERM.

LIVY.
Latin Prose Composition—completed.
SELECTIONS FROM THE GREEK HISTORIANS.
Greek Ollendorf—completed.
ALGEBRA—completed. GEOMETRY—*Robinson*.
Lectures on Elocution.

THIRD TERM.

THE ILIAD OF HOMER.
GEOMETRY AND TRIGONOMETRY—*Robinson*.
THE ART OF EXPRESSION—*Gilmore*.
Class Room Declamations.

SOPHOMORE CLASS.

FIRST TERM.

SURVEYING, NAVIGATION AND ANALYTICAL GEOMETRY.
HORACE—*Lincoln*.
Lectures on Roman History.
FRENCH—*Languellier and Monsanto*.
Lectures on the English Language and Literature.
Mediæval History.

SECOND TERM.

DIFFERENTIAL AND INTEGRAL CALCULUS—*Olney*.
SELECT ORATIONS OF DEMOSTHENES.
GERMAN—*Woodbury*.
Readings and Dissertations in English Literature—
Hales's Longer English Poems.
Mediæval History.

UNIVERSITY OF ROCHESTER.

THIRD TERM.	{	TACITUS.
		Lectures on Roman Literature.
		FRENCH.
		GERMAN.
		Readings and Dissertations in English Literature— <i>Merchant of Venice, Clarendon Press Edition.</i> Mediæval History.

JUNIOR CLASS.

FIRST TERM.	{	LOGIC— <i>Lectures.</i>
		SELECT GREEK TRAGEDIES.
		PHYSICS— <i>Snell's Olmsted and Lectures.</i>
		Lectures on Chemical Physics.
SECOND TERM.	{	RHETORIC— <i>Lectures.</i>
		PHYSICS—Continued.
		CHEMISTRY— <i>Lectures.</i>
		Lectures on Chemical Physics.
THIRD TERM.	{	CICERO DE OFFICIIS.
		Lectures on Roman Philosophy.
		LONGINUS ON THE SUBLIME, or ANALYTICAL CHEMISTRY.
		Lectures on Greek Literature.
		ASTRONOMY— <i>Loomis and Lectures.</i> Lectures on French and German Literature.

SENIOR CLASS.

FIRST TERM.	{	INTELLECTUAL PHILOSOPHY— <i>Lectures.</i>
		READINGS AND PRELECTIONS IN PLATO AND ARISTOTLE, or ANALYTICAL CHEMISTRY.
		Lectures on Greek Philosophy.
		ZOÖLOGY AND PHYSIOLOGY— <i>Lectures.</i>
		Lectures on the History of Art.
SECOND TERM.	{	INTELLECTUAL AND MORAL PHILOSOPHY.
		HISTORY OF CIVILIZATION IN EUROPE— <i>Lectures.</i>
		READINGS AND PRELECTIONS IN THE INSTITUTES OF JUSTINIAN.
		Lectures on Roman Jurisprudence.
		Lectures on the History of Art.
THIRD TERM.	{	CONSTITUTIONAL LAW AND POLITICAL ECONOMY— <i>Lectures.</i>
		STUDIES IN EARLY AND RECENT ENGLISH, or WHITNEY ON LANGUAGE.
		GEOLOGY— <i>Lectures.</i>
		Lectures on Physical Geography.

SCIENTIFIC COURSE.

Students in this course recite, so far as their studies coincide, with those in the Classical Department, using the same text-books.

FRESHMAN CLASS.

FIRST TERM.	{ ALGEBRA. LATIN. ANCIENT HISTORY— <i>Smith's Greece</i> . Phonetic Analysis and Vocal Culture. Phonography.
SECOND TERM.	{ ALGEBRA—Completed. GEOMETRY. LATIN. GREEK CLASSICS FOR ENGLISH READERS— <i>The Historians and Orators</i> . Vocal Culture. Phonography.
THIRD TERM.	{ ART OF EXPRESSION. GREEK CLASSICS FOR ENGLISH READERS— <i>The Poets and Dramatists</i> . GEOMETRY AND TRIGONOMETRY. Elocution.

SOPHOMORE CLASS.

FIRST TERM.	{ SURVEYING, NAVIGATION and ANALYTICAL GEOMETRY. FRENCH. LATIN. English Language and Literature. Mediæval History.
SECOND TERM.	{ CALCULUS. GERMAN. MEDIÆVAL HISTORY— <i>Smith's Gibbon</i> . English Language and Literature.
THIRD TERM.	{ FRENCH. GERMAN. LATIN. English Language and Literature. Mediæval History.

UNIVERSITY OF ROCHESTER.

JUNIOR CLASS.

FIRST TERM.	{ LOGIC. ENGLISH LITERATURE— <i>Backus's Shaw</i> . PHYSICS. Lectures on Chemical Physics.
SECOND TERM.	{ RHETORIC. PHYSICS. CHEMISTRY. Lectures on Chemical Physics.
THIRD TERM.	{ ANALYTICAL CHEMISTRY. ASTRONOMY. LATIN. Lectures on French and German Literature.

SENIOR CLASS.

FIRST TERM.	{ INTELLECTUAL PHILOSOPHY. ZOOLOGY AND PHYSIOLOGY. ANALYTICAL CHEMISTRY. Lectures on the History of Art.
SECOND TERM.	{ INTELLECTUAL AND MORAL PHILOSOPHY. LATIN, or ADVANCED GERMAN. HISTORY OF CIVILIZATION. Lectures on the History of Art.
THIRD TERM.	{ STUDIES IN EARLY AND RECENT ENGLISH, or WHITNEY ON LANGUAGE. GEOLOGY. CONSTITUTIONAL LAW AND POLITICAL ECONOMY. Lectures on Physical Geography.

CONSPECTUS OF EXERCISES.

FIRST TERM.

CLASS.	HOUR.	INSTRUCTOR.	SUBJECT.	REMARKS.
Seniors . . .	9.15-10.15 10.15-11.15 10.15-11.15 11.15-12.15	Pres. ANDERSON Prof. KENDRICK Prof. LATTIMORE Prof. LATTIMORE	Intellectual Philosophy. Greek (<i>Plato</i>). Analytical Chemistry. Zoology and Physiology.	On Saturday, 9.15-10.15, the Seniors receive Lectures from President ANDERSON on the History of Art.
Juniors . . .	9.15-10.15 10.15-11.15 11.15-12.15	Prof. ROBINSON Prof. GILMORE Prof. KENDRICK	Physics. Logic. Greek (<i>Sophocles</i>).	On Saturday, 9.15-10.15, the Juniors receive Lectures from Prof. LATTIMORE on Chemical Physics.
Sophomores .	9.15-10.15 10.15-11.15 11.15-12.15	Prof. MOREY Prof. MIXER Prof. QUINBY	Latin (<i>Horace</i>). French. Surveying and Analytical Geometry.	On Monday, 11.15-12.15, the Sophomores receive Lectures from Prof. GILMORE on the English Language; On Saturday, 9.15-10.15, from Prof. MOREY on Mediaeval History.
Freshmen . .	9.15-10.15 10.15-11.15 11.15-12.15	Prof. MIXER Prof. ROBINSON Prof. MOREY	Greek (<i>Xenophon</i>). Algebra. Latin (<i>Liwy</i>).	On Saturday, 9.15-10.15, the Freshmen receive Lectures from Prof. GILMORE on Phonetics and Vocal Culture.

SECOND TERM.

CLASS.	HOOR.	INSTRUCTOR.	SUBJECT.	REMARKS.
Seniors . . .	9.15-10.15 10.15-11.15 10.15-11.15 11.15-12.15	Pres. ANDERSON Prof. MOREY Prof. LATTIMORE Pres. ANDERSON	Moral Philosophy. Roman Law (<i>Justinian</i>). Analytical Chemistry. History.	On Saturday, 9.15-10.15, the Seniors receive Lectures from Pres. ANDERSON on the History of Art.
Juniors . . .	9.15-10.15 10.15-11.15 11.15-12.15	Prof. ROBINSON Prof. GILMORE Prof. LATTIMORE	Physics. Rhetoric. Chemistry.	On Saturday, 9.15-10.15, the Juniors receive Lectures from Prof. LATTIMORE on Chemical Physics.
Sophomores .	9.15-10.15 10.15-11.15 11.15-12.15	Prof. KENDRICK Prof. MIXER Prof. QUINBY	Greek (<i>Demosthenes</i>). German. Calculus.	On Monday, 9.15-10.15, the Sophomores meet Prof. GILMORE in English Literature; On Saturday, 9.15-10.15, Prof. MOREY in Medieval History.
Freshmen .	9.15-10.15 10.15-11.15 11.15-12.15	Prof. MIXER Prof. ROBINSON Prof. MOREY	Greek (<i>Historians</i>). Algebra and Geometry. Latin (<i>Livy</i>).	On Saturday, 9.15-10.15, the Freshmen receive Lectures from Prof. GILMORE on Elocution.

THIRD TERM.

CLASS.	HOUR.	INSTRUCTOR.	SUBJECT.	REMARKS.
Seniors . . .	9.15-10.15	Prof. LATTIMORE	Geology.	On Saturday, 9.15-10.15, the Seniors receive Lectures from Prof. LATTIMORE on Physical Geography.
	10.15-11.15	Prof. GILMORE	Early English.	
	10.15-11.15	Prof. LATTIMORE	Analytical Chemistry.	
	11.15-12.15	Pres. ANDERSON	Political Economy and Constitutional Law.	
Juniors . . .	9.15-10.15	Prof. ROBINSON	Astronomy.	On Saturday, 9.15-10.15, the Juniors receive Lectures from Prof. MIXER on French and German Literature.
	10.15-11.15	Prof. MOREY	Cicero's Philosophical Works.	
	11.15-12.15	Prof. LATTIMORE	Analytical Chemistry.	
	11.15-12.15	Prof. KENDRICK	Greek (<i>Longinus</i>).	
Sophomores .	9.15-10.15	Prof. MIXER	French.	On Monday, 11.15-12.15, the Sophomores meet Prof. GILMORE in English Literature; On Saturday, 9.15-10.15, the Sophomores receive Lectures from Prof. MOREY on Medieval History.
	10.15-11.15	Prof. MIXER	German.	
	11.15-12.15	Prof. MOREY	Latin (<i>Tacitus</i>).	
Freshmen . .	9.15-10.15	Prof. GILMORE	Art of Expression.	On Saturday, 9.15-10.15, the Freshmen meet Prof. GILMORE for Declamations.
	10.15-11.15	Prof. KENDRICK	Greek (<i>Homer</i>).	
	11.15-12.15	Prof. QUINBY	Geometry and Trigonometry.	

General View of the Curriculum.

One who desires to understand the work which the University attempts to perform, may be referred to the tabular statement, already given, of the courses of study which are prescribed for students. It seems appropriate, however, that special attention be called to some features in the several departments of instruction.

THE DEPARTMENT OF METAPHYSICS.

Intellectual and Moral Philosophy are taught mainly by lectures. Propositions, embodying an outline of these subjects, with a condensed discussion of each, are dictated to the class. Copious illustrations of the topics are then given, with full opportunities for question and discussion on the part of the class, until the doctrine set forth is completely understood. The design of the course is to fix convictions in the student's mind regarding the certainty, and necessary limits, of human knowledge; and show that man has a moral and intellectual constitution, existing, in the germ, before the processes of thought and action begin.

In furtherance of these objects, recourse is constantly had to the history of thought on the topics discussed, with a view to set forth the gradual progress in this direction toward definite and scientific conceptions of man's nature. Care is taken to put over against each truth taught, its antagonistic error; and also to select illustrations of these subjects from common life, so that the student, in acquiring a knowledge of the mental and moral constitution of *man*, shall be, at the same time, gaining that practical

knowledge of *men* which shall conduce to his success in the business, or profession, which he proposes to enter.

THE CLASSICAL DEPARTMENT

aims, by the careful reading of the Greek and Latin classics, and by assiduous practice in writing Greek and Latin prose, to give the student such familiarity with the Classical tongues, as shall unlock to him the treasure-house of ancient thought and feeling; and, at the same time, fit him to acquire a more complete mastery of those modern languages which are so largely derived from Classical sources. The Classics are studied not in a spirit of blind veneration for antiquity; but as illustrating the universal laws of language, as presenting the most perfect specimens of literary composition, and as laying open the sources from which have been derived invaluable elements in modern civilization. Special attention is given, on the one hand, to the historic development and the most important speculative results of Greek Philosophy; and, on the other, to the growth, the general principles, and the permanent influence of Roman Jurisprudence. The Classics are further utilized by making them supplement other courses of study—Longinus, Plato and Cicero being read in connection with instruction in Rhetoric and Mental and Moral Philosophy.

THE DEPARTMENT OF HISTORY.

Although the Faculty of Instruction embraces no officer who is distinctively charged with the care of this department, an ample course of historical studies is provided for the student. Instruction is given in Greek and Roman History in connection with the Classical Department. Mediæval History is taught in weekly lectures which cover three entire terms. The study of the English Language and Literature is necessarily approached from an Ethnologic and Historic point of view. In every department of instruc-

tion, indeed, especial attention is given to the origin and development of the science taught: so that the methods of Historic investigation are constantly applied and exemplified. During the Senior year, an entire term is devoted to the study of History—lectures being given on Physical Geography, Ethnology, and on a series of fundamental topics which include an outline survey of the forces, moral and physical, that have resulted in modern civilization, and in the formation of the state systems of Europe and America. Another term is divided between Political Economy and the Constitutional Law of England and the United States.

THE DEPARTMENT OF RHETORIC

is regarded as an organic whole whose reciprocally dependent parts are :

1. The Laws of Thought, or *Logic*.
2. The Laws of Expression, or, in the abstract, *Rhetoric*; in the concrete, *Literature*—both, of course, presupposing, for the English student, a minute and thorough acquaintance with the *English Language*.
3. The Laws of Utterance, or *Elocution*.

In accordance with this conspectus, the student is taught, from the very outset of his course, to analyze his mental processes and adapt his words to his thoughts; his tones and gestures to his words. Particular attention is paid to the study of the English Language in its origin and development, and in its use by such writers as Chaucer, Shakspeare, Bacon and Milton—whose works are studied with the same care as those of Horace, Sophocles, Plato and Homer.

In connection with this department, orations are delivered before the University, by students in the third term of the Junior,

and the first and second terms of the Senior year—each student being required to prepare and deliver at least one oration in each term.

During the Freshman year, there is a regular weekly exercise in Phonetic Analysis and Elocution. Members of the Junior and Sophomore classes are required to present original essays, or oral dissertations, twice, at least, in each term. These essays are freely used for class-room illustration of Rhetorical excellences and defects.

DEPARTMENT OF MODERN LANGUAGES.

This department embraces a course of at least two terms in French, and two in German, for every student who is a candidate for a degree.

While the philological study of these languages is held constantly in mind, such colloquial drill is given as may prepare the student for using them in the business of life.

THE DEPARTMENT OF MATHEMATICS.

During the first two years of the regular course, the classes have a continuous drill in Pure Mathematics, beginning with the generalizations of higher Algebra, and closing with the Calculus. Then follow Mathematics as applied to Natural Philosophy and Astronomy. While the disciplinary exercises of the student are necessarily abstract, it is the design of the officers in charge of this department to show, by lectures and illustrations, that the formulas of Mathematics are the keys of natural phenomena, and that they underlie the practical arts of life. It is further believed that Mathematics, like Politics, are best studied in their historical development. The discovery and history of formulas are, therefore, made the frequent theme of class-room conversation.

DEPARTMENT OF NATURAL SCIENCE.

In the Department of Natural Science, instruction is given mainly by lectures. Zoölogy and Physiology are studied by the Senior Class during the first term. An outline of the general principles of Zoölogy, embracing the characteristics and methods of classification of the Animal Kingdom, is followed by a more special study of Human Physiology and Anatomy, with constant reference to the structure and functions of the inferior animals, seeking thus, by making it a study of comparisons and analogies, to develop the existence of a comprehensive plan in organic nature. Constant attention is given, in this department, to the principles of Hygiene.

During the third term, the Senior Class receive a course of daily lectures on Geology, illustrated by the extensive Lithological, Mineralogical and Palæontological Collections of the Cabinet, representing all the explored portions of the earth's crust.

DEPARTMENT OF CHEMISTRY.

During the first term, a course of lectures is given on Chemical Physics to the Junior Class, followed, during the second term, by a course of daily lectures on General Chemistry. The properties of the elementary bodies, and their more important combinations, are fully illustrated by experiments in the lecture room. Special attention is given to the economic and industrial applications of Chemical Science. Frequent opportunities are afforded for visiting the various manufacturing establishments of the city, in which Chemical processes are practically applied.

To supplement the instruction given to undergraduates in General Chemistry, a Laboratory has been provided and furnished with the requisite apparatus, for the use of those who may wish to pursue a more extended course of theoretical and practical Chem-

istry, by conducting their own experiments and investigations, under the direction of the professor. This Laboratory has recently been enlarged and re-fitted, to meet the increasing demands upon it.

Special students are admitted to the Laboratory for instruction in the theory and practice of Chemical Analysis, qualitative and quantitative; the application of Chemistry to Agriculture, Pharmacy, the Mechanic Arts, etc. For further particulars respecting this department, application may be made to the Professor of Chemistry.

MORAL AND RELIGIOUS CULTURE.

It is the aim of the Faculty, in connection with the discipline of the intellect, to inculcate a pure morality, and those truths and duties concerning which all Christians are agreed. The public duties of each day are opened at 9 o'clock A. M., with reading of the Scriptures, singing and prayer, in the University Chapel. The students are required to attend, unless specially excused by the Faculty.

In the Greek Department there is a weekly recitation in the Greek New Testament.

Weekly prayer meetings are held under the auspices of the Young Men's Christian Association, in a room, centrally situated, which the Trustees have provided for that purpose. Prayer meetings are also held by each class, at the close of the Saturday morning recitation.

Parents and guardians are requested to designate places of worship, at which their sons, or wards, are expected to attend regularly on the Sabbath.

The Cabinets and Library.

GEOLOGY AND MINERALOGY.

These Cabinets, containing over 40.000 carefully selected specimens, are an encyclopædia of the sciences which they illustrate. They were collected by Professor Ward, during ten years of extensive foreign travel, and during many careful visits to a large number of the most fruitful American localities. Having been compiled, from the first, upon a plan which contemplated the most complete illustration of every point in these two departments of inorganic nature, it is believed that they offer opportunities to students of these sciences, unsurpassed in this country.

The Cabinet of Geology commences with a collection of over 3.000 rocks, arranged in orders and families, in explanation of the science of Lithology. Every rock species, as recognized by the latest authors, is contained in this series; and all points of interest in technical, or economic, Geology are amply illustrated.

Another series of rocks illustrates the several Geologic formations. Other series are Geographic in their character, and show the student the mineral composition of some typical Geographic region.

The Lithologic section of the cabinet also contains a valuable series of rocks, collected by Prof. James Orton—now of Vassar College—illustrative of the Geology of the Andes.

The collections of fossils are from the standard localities in Europe and America, and represent the animal and vegetable life

which covered the surface of the earth during each of the great Geologic periods.

A prominent feature of the Cabinet consists in its plaster copies, perfect in form and dimensions, of all the well known genera of fossil quadrupeds.

A section of the Geologic Cabinet embraces a series of models, maps, sections, ideal landscapes, and cuts of fossils, intended to illustrate the lectures which are given upon these subjects.

The Cabinet of Minerals is equally rich and comprehensive. It begins with several extensive series of specimens intended to illustrate the subject of Crystallography and the physical properties of minerals; and contains about 5.000 choice specimens, representing four-fifths of all the species known.

CABINET OF ARCHÆOLOGY.

The foundation has been laid for a Cabinet of Archæology by the purchase of a small, but well-authenticated, collection of flint and bronze implements from the drift region of Abbéville and St. Acheul, in France. To this cabinet some specimens of the stone implements of the American Indians have been added; and it has also been enriched by a very choice collection of stone implements from the vicinity of Copenhagen—the genuineness of which is attested by the most eminent Danish archæologists. During the past year, the value of this Cabinet has been enhanced by the addition of numerous specimens of pottery from the tombs of the Incas.

LIBRARY.

The Library of the University is open daily, from 8 to 9 A. M., and on Saturday, from 10:15 to 12 A. M., for consultation and for

the drawing of books. All the students have access to the Library, and are aided in consulting it by the Librarian and other members of the Faculty. The Library contains 12,000 carefully selected volumes, and especial pains is taken to make its contents practically available by card-catalogues and indexes of periodical and miscellaneous literature—all of which are brought down to date, and accessible to every student.

The Library of the Rochester Theological Seminary is freely accessible to students of the University.

THE RATHBONE LIBRARY FUND.

the gift of Gen. John F. Rathbone, of Albany, amounts to twenty-five thousand dollars, and will, it is expected, be largely increased on the completion of the Sibley Library Building. In the purchase of books, preference is given to those works which are demanded by the officers and students for the successful prosecution of their inquiries in the various departments of study.

RECITATIONS AND EXAMINATIONS.

Recitations are held from 9:15 to 12:15 A. M.—each class having three daily exercises of one hour. The number, or length, of these exercises may be increased at the discretion of the Faculty. On Saturday, the classes attend in the lecture-room but one hour; and that, rather for instruction than for recitation.

Examinations are conducted by a combination of written and oral exercises; and in the presence of a Committee of the Faculty. Students pursuing an Eclectic Course are required to pass the

examinations of the departments with which they connect themselves. No student is admitted to examination whose absences, during the term, exceed twenty per cent. of the exercises of the department in which he presents himself for examination.

Examinations are held, on each study, at the close of the term during which it has been pursued. Examinations for delinquent students are held on the third Saturday after the beginning, and the third Saturday before the end, of each term.

PUBLIC EXERCISES.

1. Prize Declamations by the Sophomore Class, on the Monday evening preceding Commencement.

2. Commencement, on the Wednesday preceding the Fourth of July.

EXPENSES.

The University has no dormitories, conforming, in this respect, to the German, rather than the English model. Those who send their sons, or wards, to the University, are recommended to secure for them, so far as practicable, the influence of a Christian home. Unfurnished rooms, which afford suitable accommodations for two students, can, however, be secured for \$1.00 per week. The average price paid for a furnished room, suitable for two students, is about \$2.00 per week. Boarding can be obtained in private families for from \$3.50 to \$5.00 per week. The Janitor

of the University will furnish its patrons with all necessary information respecting rooms and boarding.

Tuition, per term, including incidentals, \$25.00.

The rules established by the Trustees, with reference to the payment of tuition, *require the settlement of all bills at the beginning of each term*; that students in the Eclectic course pay full tuition; and that orders for tuition on scholarships be presented as soon as received. No deduction is made for absence.

A large number of students find profitable employment in the city, in teaching private pupils and classes, and in various other occupations—thus enabling them to provide, in considerable part, for the expenses of their education. Students who have practical acquaintance with any of the useful arts, are able to procure constant and remunerative employment in the city.

Indigent students for the ministry, regularly approved by churches, receive assistance from the *New York Baptist Union for Ministerial Education*, and, under certain conditions, free tuition from the University, which has set apart forty scholarships for this purpose.

Other indigent students, of good character, are occasionally assisted from funds at the disposal of the President.

Parents and guardians are earnestly requested to exercise a careful supervision over their sons, or wards, and to discriminate between necessary and unnecessary expenses. Experience proves that nothing has a more unfavorable influence upon a student's conduct and habits of study, than the unrestrained use of money.

PRIZES. EXTRA STUDIES. ETC.

THE DAVIS PRIZE MEDALS.

The sum of \$1.000 has been given to the University by the Hon. Isaac Davis, LL. D., of Worcester, Mass., the annual income of which is, by the direction of the donor, to be expended in purchasing two gold medals of unequal value, to be given to the two members of the graduating class whose orations, on Commencement Day, shall exhibit, respectively, the first and second grades of excellence in thought, composition and delivery combined.

THE STODDARD PRIZE MEDAL.

Professor John F. Stoddard—himself a distinguished Mathematical instructor—has given to the University the endowment for a gold medal of the value of one hundred dollars, which is to be awarded to the student in each graduating class, (having been three years a member of the University, and having maintained a good standing in all the studies of the curriculum,) who shall, immediately previous to graduation, have passed the best examination on the Mathematical studies of the entire course, and also on some special topic to be assigned by the Faculty—provided that such examination shall have attained to a certain absolute value.

The special topic on which the members of the present Senior Class will be examined, is: THE THEORY AND USES OF THE PENDULUM.

THE DAVIS SCHOLARSHIP.

A scholarship, yielding seventy dollars a year, for the benefit of some indigent student, has been founded by the Hon. Isaac Davis, LL. D. The income of this scholarship is now available under certain conditions, affecting character and standing, prescribed by the founder.

THE SHELDON SCHOLARSHIP.

By the liberality of Abraham Sheldon, Esq., of Adams Centre, free tuition has been provided forever for some student, who shall be approved by the Faculty as especially worthy of assistance.

THE JOHNSON SCHOLARSHIP.

A similar scholarship has recently been established by the children of the late Elias Johnson, Esq., of Troy.

THE CITY SCHOLARSHIPS.

In recognition of the interest taken by the citizens of Rochester in the establishment of the University, twelve scholarships, which entitle their holders to free tuition, have been granted to the City of Rochester by the Board of Trustees. These scholarships, to the number of three in each class, are awarded as prizes for excellence in the studies of the Rochester City Schools, preparatory to college.

SENIOR PRIZE ESSAY.

A prize will be given to the member of each Senior Class, of approved scholarship, who shall, on the first Monday in the third term, present the best essay upon a subject selected by the Faculty.

The subject for the present year is : WORDSWORTH'S PLACE IN LITERATURE.

POST GRADUATE SCHOLARSHIPS.

During the past year, the University has received from Isaac Sherman, Esq., of New York, the sum of \$5.000, the interest of which is to be applied to the support of some member of each graduating class (to be selected by competitive examination) while engaged in post-graduate studies, under the supervision of the Faculty, in the Department of Political Economy. More specific statements with reference to this scholarship will be made in the next Catalogue. For the present year, the income of THE SHERMAN SCHOLARSHIP will, with the permission of its founder, be devoted to the purchase of books in the Department of Political Economy.

It is anticipated that the sum of three hundred dollars *per annum* will, within the present year, be made available, by another friend of the University, for a similar Scholarship in the Department of Constitutional Law and the History of Political Institutions.

THE DEWEY PRIZE DECLAMATIONS.

Prizes are given for the best exercises in Declamation, by members of the Sophomore Class—those students only being allowed to compete whose standing and deportment are especially approved by the Faculty. The funds for this purpose are derived from a bequest by the Rev. Dr. Beadle, of Philadelphia, a pupil and friend of the late Dr. Dewey.

EXTRA STUDIES WITH PRIZES.

Students whose attendance and deportment are entirely satisfactory, and whose scholarship, in all departments, reaches a certain fixed standard, are permitted to pursue studies additional to the required curriculum, with a view to competition for prizes.

JUNIOR CLASS.

A prize will be given to the member of the Junior Class who shall pass the best examination upon some portion of a Greek author, selected by the Faculty, which shall have been read in addition to the regular and required course of Greek studies.

The examination for the present year will be on SELECTIONS FROM FELTON'S MODERN GREEK WRITERS, with an essay on the Distinctive Characteristics of the Modern Greek Language.

SOPHOMORE CLASS.

A prize will be given to the member of the Sophomore Class who shall pass the best examination upon some portion of a Latin author, selected by the Faculty, which shall have been read in addition to the regular and required course of Latin studies.

The examination for the present year will be on THE FOURTH BOOK OF THE DE CIVITATE DEI OF AUGUSTINE, with an essay on the Influence of Christianity on the Latin Language.

FRESHMAN CLASS.

A prize will be given to the member of the Freshman Class who shall pass the best examination upon some branch of

Mathematical study, selected by the Faculty, in addition to the regular and required course.

The examination for the present year will be on SYMMETRICAL FUNCTIONS OF ROOTS AND THEORY OF ELIMINATIONS, as developed in Todhunter's *Theory of Equations*.

EXTRA STUDIES WITHOUT PRIZES.

Students whose attendance and deportment are entirely satisfactory, and whose scholarship, in all departments, is such that their attention can be diverted from their regular studies without detriment, are encouraged to pursue studies additional to the required curriculum, under the direction of the Faculty, without competition for prizes. The successful prosecution of such studies—which will be tested by careful examination—is distinguished by honorable reference in the annual catalogue of the University. The intention to study for Honorable Mention, and the course of study to be pursued, must be approved, in advance, by the Faculty; and no Honorable Mention will be given for studies which are not fairly equivalent, both in quantity and quality, to a daily recitation for one term in the department in which the student presents himself for honors.

Awards for the last Academic Year.

SENIOR CLASS.

The following students are honorably distinguished for work done, beyond the requirements of the University, during the last academic year :

The Stoddard Prize Medal, for excellence in Mathematics, was awarded to
SPENCER HEDDEN FREEMAN.

Committee of Award :

Prof. A. B. Evans.
Prof. Quinby.

The First Davis Medal, for the best oration on Commencement Day, including composition and delivery, was awarded to A. FRANK JENKS ; and the Second Davis Medal, to J. WEED MUNRO.

Committee of Award :

Rev. S. S. Cutting, D. D.,
Chas. E. Fitch, Esq.,
C. C. Merriman, Esq.

The Prize for the best essay on *Journalism*, was awarded to JACOB SLOAT FASSETT.

Honorable Mention was made of JAMES W. WHITE and FRANCIS R. WELLES.

Committee of Award :

Rezin A. Wight, Esq.,
John R. Howard,
Rossiter Johnson.

UNIVERSITY OF ROCHESTER.

JUNIOR CLASS.

For an examination on the *First and Second Books of Aristotle's Politics*, the First Prize was awarded to JOHN BETTS CALVERT; the Second, to FRED. AUGUSTUS VANDERBURGH.

Committee of Award:

Prof. F. B. Palmer.

FRED. AUGUSTUS VANDERBURGH is entitled to Honorable Mention for an examination on Jevons's Logic, Fowler's Inductive Logic, and Whately's Rhetoric.

SOPHOMORE CLASS.

For Excellence in Declamation, the First Prize was awarded to THEODORE A. LEMEN; and two Second Prizes to JAMES D. SQUIRES and LUTHER M. HAIR. Honorable Mention was made of EDMUND LYON.

Committee of Award:

Rev. A. J. Sage, D. D.,

Rev. C. B. Gardner,

Prof. S. C. Pierce.

For an examination on the *De Legibus of Cicero*, the First Prize was awarded to EUGENE C. AKIN; the Second, to JOHN E. BROWN.

Honorable Mention was made of CHAS. E. DARROW and C. N. DOUGLASS.

Committee of Award:

Prof. D. S. Benjamin.

UNIVERSITY OF ROCHESTER.

FRESHMAN CLASS.

For an examination on *The Nature and Composition of Equations*, the First Prize was equally divided between RANSOM HARVEY and GEORGE F. SLOCUM.

Honorable Mention was made of ROBERT BARDWELL WICKES.

Committee of Award :

Prof. H. G. Burlingame.

GEORGE F. FLANNERY is entitled to Honorable Mention for an examination on *Nepos's Lives*.

WILLIAM H. DEXTER is entitled to Honorable Mention for an examination on a course of reading in the History of Arithmetic, Algebra and Geometry.

VACATIONS.

1. Of ten days, including the Christmas Holidays.
2. Of one week, from the end of the Second Term.
3. Of eleven weeks, immediately after Commencement.

The College Exercises are suspended on :

The Day of General Election for the State of New York.

Thanksgiving Day.

The Day of Prayer for Colleges.

Washington's Birth-Day.

Decoration Day.

The Anniversary of the Rochester Theological Seminary.

CALENDAR.

1875-6.

FIRST TERM ENDS.....	December 23.
SECOND TERM BEGINS.....	January 4.
DAY OF PRAYER FOR COLLEGES.....	January 27.
SECOND TERM ENDS.....	April 5.
THIRD TERM BEGINS.....	April 13.
SENIOR EXAMINATION.....	May 25-27.
SERMON BEFORE THE CHRISTIAN ASSOCIATION.....	June 25.
EXAMINATIONS FOR ADMISSION.....	June 26-27.
SOPHOMORE PRIZE DECLAMATIONS.....	June 26, (evening.)
CLASS-DAY.....	June 27.
ORATION AND POEM BEFORE THE ALUMNI.....	June 27, (evening.)
COMMENCEMENT.....	June 28.
EXAMINATIONS FOR ADMISSION	September 13.
FIRST TERM BEGINS.....	September 14.
FIRST TERM ENDS	December 22.
